Write a Java program to check whether a person is eligible for voting. If not, display how many years are left.

Your Code

```java
import java.util.*;
class Main
{
    public static void main(String[] args)
    {
        Scanner sc = new Scanner(System.in);
        int age = sc.nextInt();
        if(age >= 18)
        {
            System.out.println("eligible for voting");
        } else {
            System.out.println("Not Eligible");
            System.out.println("Years left = "+(18 - age));
        }
    }
}
```

Input

16

Output

```
Not Eligible
Years left = 2
```

Write a Java program to find the sum and average of five numbers. Get the input from the user.

Your Code

```java
import java.util.*;
class Main
{
    public static void main (String args[])
    {
        Scanner sc = new Scanner(System.in);
        int sum = 0;
        for(int i=0;i<5;i++)
        {
            sum += sc.nextInt();
        }
        double avg = sum/5.0;
        System.out.println("Sum = " + sum);
        System.out.println("Average =" + avg);
    }
}
```

Input

```
10 20 30 40 50
```

Output

```
Sum = 150
Average =30.0
```
